updated 8. 1. 2023 | published 8. 1. 2023

Summary

Cubby grid for the Ford Maverick that can be used to attach an air vent phone mount.

[Toys & Games](#) > [Vehicles](#)

Tags: [cubby](#) [ford](#) [fordmaverick](#) [maverick](#) [mount](#)

Cubby grid used to mount a phone in the Ford Maverick.

Please note that this model will not fit all phone mounts. In particular, the iOttie mount is too large for this cubby's slots. A version compatible with the iOttie will be uploaded soon.

To use:

1. Remove the existing bottom insert in the cubby.
2. Add the cubby grid. (You should hear a slight "click")
3. Add your phone mount to any of the sections you'd like.

Printing Instructions

Print with PETG at 235 C, bed temp at 80. Slice the model with it laying on its face as this doesn't require supports.

Note: Do NOT print this in PLA as it will deform in the sun.
